

The Power Of Research

The history of research in America is astonishing. From eradicating polio to organ transplants and everything in between. Just look at my own story, I was diagnosed with stage four melanoma in 2014, so the following statistics are close to my heart:

Diagnosed with stage four melanoma:

YEAR	SURVIVAL RATE
2000	5%
2015	15%
2020	60%!!!

The American Cancer Society contributes one billion dollars per year to cancer research. This is what research can accomplish!!!

In 2021 the odds of recovery for someone with the disease of Addiction is only 2%!

ARI is dedicated to funding research to cure addiction. If all of us work together we can win this war
